karl.gildenhuys@gmail.com · **LinkedIn** · **Portfolio**

I am a full stack software developer with proven experience building and maintaining complex software products. Day to day I work in a scrum team to deliver bug fixes, improvements and quality assurance. I also code in my spare time, creating projects which challenge and improve my coding skills.

Skills

Javascript · SQL · React · ABAP · SAP PM · C# .NET · Scrum · Git

Experience

15 March - Present

Accenture | Application Development Analyst

I work as 1 of 6 developers to build a software product called BlueWorx.

Key responsibilities:

- Fullstack development with Javascript and ABAP
- SME for our GIS maps implementation
- Quality assurance
- Develop new features and improvements for clients
- Fix bugs

Projects

Leolang | Application

A demo application to teach te reo Māori through reading. Built with React and Node.

Website · **Github**

KurzUrl | API

A simple url shortener service built in ASP .NET.

Website · **Github**

Education

2019 - 2022

University of Auckland | BSc, Computer Science
